Biofilm Communication

As is common in most businesses, including BOPP, mergers, acquisitions or new investments are constantly being evaluated.

In the last few years, on many occasions, the company has received multiple inquiries toward merging or acquiring our interests. Likewise, Biofilm has entertained similar interests toward other companies which could lead to new opportunities within the market of packaging.

Relative to the information recently published regarding a possible acquisition of Biofilm by the Peruvian company, OBEN Holding Group (OHG), Biofilm wishes to clarify that OHG contacted Biofilm and we agreed to consult the Superintendence of Industry and Commerce to better understand Colombian competition policy.

However, the discussion between the Peruvian company and the shareholders of Biofilm has been dismissed.
